

KONE MonoSpace® 300

KONE SIGNALIZATION

KONE MonoSpace 300 signalization fixtures are mounted into the elevator entrance for simplex elevators. If your elevator solution is a duplex, elevator signalization will be mounted on the lobby wall.

KSS 140

KSS 140 is designed to withstand the most demanding environments by being impact, burn and splash resistant. Scratch resistance is achieved by utilizing the textured Scottish Quad finish option.

Finish options:

Scottish Quad
Brushed Stainless Steel (4SS; Grade 441)

Brushed Stainless Steel (4SS; Grade 304)

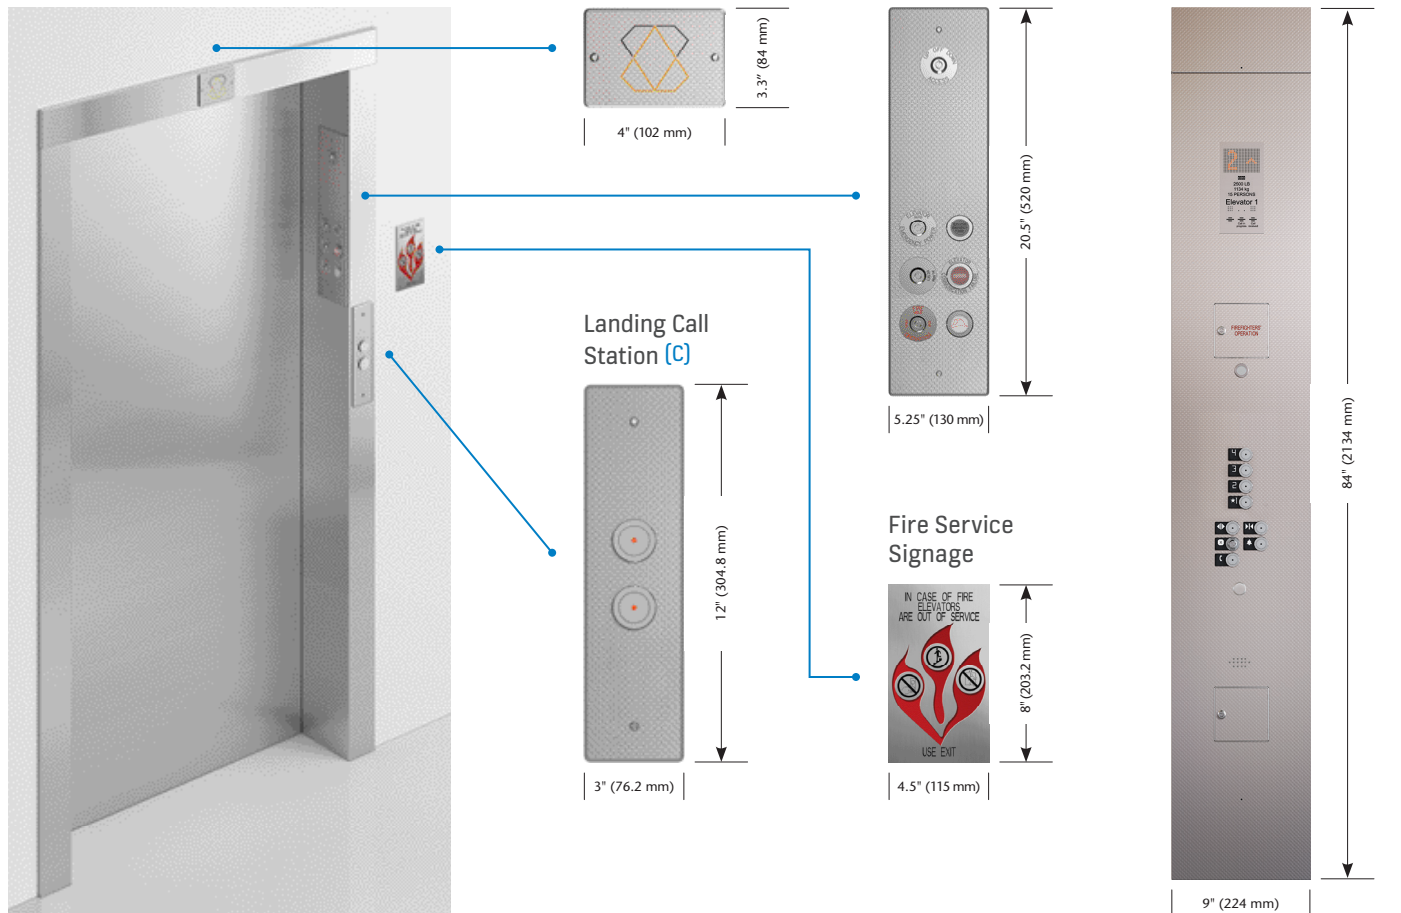

Display: Amber dot matrix

Mounting: Flush

Buttons: Vandal; metallic, impact-resistant, round amber call acceptance light

Max landings: 4 floors

ELEVATOR CAR ENTRANCE

(A) Height off finished floor Entrance width 81" (2188 mm)

(B) Height off finished floor to centerline hoistway switch: 72" (1830 MM)

(C) Height off finished floor to centerline of landing hall station: 47" (1196.5 mm)

*If IBC 2018 or greater code is applicable, contact your local sales professional for car operation panel options.
