Notes
(1) For speeds above 1000 fpm (5.00 m/s) or travel above 590’ (180 m) contact your KONE Sales Professional for design and planning assistance.
(2) For 700 fpm (3.56 m/s) and 1000 fpm (5.00 m/s) front opening passenger configurations add 2” (51 mm) to the hoistway depth.
(3) Information is based upon chain compensation. For rope compensation applications, please consult your KONE Sales Professional.
(4) All dimensions are based on an 8’-0” (2,438 mm) cab with a 7’-0” (2,134 mm) door. Alternate car and door heights are available, but will affect dimension I.
(5) If occupied space exists below the hoistway, consult your KONE Sales Professional.
(6) Information is based upon structural machine room floor slabs. For machine beam applications, please consult your KONE Sales Professional.
(7) Machine room height of 8’-0” (2,438 mm) is measured from the machine room floor surface to underside of the lowest obstruction above the machine.
(8) For service applications the machine room is not centered on the hoistway and requires an additional 7” (178 mm) of width. The additional 7” (178 mm) should be added to the counterweight side. Consult your KONE Sales Professional for details.
(9) 4’-0” (1219 mm) door width also available.
